# 9 GAMES THAT CAN HELP YOU LEARN TO CODE

- **CODEMONKEY**

It teaches you to build a game from scratch using HTML5. It uses CoffeeScript which is an open-source programming language and compiles to JavaScript.

- **CODINGAME**

It offers fun free open source programming games to learn more than 25 programming languages, and you can play with your friends and take part in competitions.

- **CSS DINER**

CSS Diner is a simple but fun game to learn CSS for beginners. There are 32 levels and in each level, you will know how CSS selectors work with increasing difficulty.

- **RUBY WARRIOR**

If you're someone who is fascinated by RUBY language and wants to learn, then this game is for you. It has beginner to intermediate levels so you can go from scratch to higher levels.

- **UNTRUSTED**

Untrusted is a meta-JavaScript adventure game that tests your JavaScript skills to solve problems. You use JavaScript to guide Dr. Eval through a machine continuum and alter his reality to move between levels.

- **ROBOCODE**

If you've ever watched the show BattleBots, then Robocode is for you. You'll learn programming skills by building virtual robot battle tanks in Java or .NET. Battles are then played out onscreen in real-time.

- **CYBER DOJO**

Cyber Dojo has practice exercises and challenges for a lot of programming languages. Each exercise spells out a challenge to complete with an example showing what the end result should look like.

- **FLEXBOX FROGGY**

Want to learn how CSS Flexbox works? Check out Flexbox Froggy. It has a simple interface that teaches you the basics of how things align in Flexbox while you help Froggy and his friends — save Froggy and be a CSS Flexbox expert at the same time.
